

Light comes

Come light, come !
Pour away your fervour on our fallow land
Light, go through the garden of our hand
Grind the rice then blow
Give the colours that shine
And make our garden of Eden grow

Come light, come !
With you, we'll maintain there the days
Take care of the good man at his noon
Blow and vanish icons
Do wake-up Eves
Make earth shine like ebony
Drive this will to harmony

Light come with the light
Light the shadows and dark side
Give them deep breath
Pierce their hearts of ices
Give birth to orange and green in the night
To sketch their little faces
To make our earth sprouting with you, light

Viens lumière !

Viens lumière !
Eclaire notre terre en jachère
Irradie notre paradis
Prends l'iris en contraste
Jonche la nouvelle ère
Pulvérise le riz
Donne blanc, noir puis le gris

Viens lumière !
Eclaire ! Sois là, lumière
Caresse le juste au midi
Brûle l'iconoclaste
Allume l'Eve
Distribue les rires
Canalise l'harmonie en lazer

Viens lumière !
Eclaire-les ! D'ombres et de lumières
Sublime leur esprit
Traverse leur coeur de glace
Dessine d'orange et de vert
Leurs jolis mimis
Rends le bonheur et la chaleur à notre terre
